

Product Name

Name: Iscove's Modified Dulbecco's Medium (IMDM), with L-Alanyl-L-Glutamine, without Phenol Red

Cat. No.: C3041-0500

Size: 500 mL

Product Description

Iscove's Modified Dulbecco's Medium is an enriched modification of Dulbecco's Modified Eagle's Medium wherein serum can be partially or totally replaced by chemically defined substances. The medium contains additional amino acids, sodium selenite, sodium pyruvate, vitamins, and inorganic salts. Potassium nitrate is substituted by ferric nitrate. IMDM was the first medium utilizing HEPES buffer. Appropriately supplemented, the medium supports the growth of precursor cells of erythrocytes and macrophages. The medium also supports the growth of T and B lymphocytes as well as a variety of hybrid cells under serum-free or reduced serum conditions.

The culture medium has been supplemented with L-Alanyl-L-Glutamine in place of L-Glutamine. Compared with L-Glutamine, L-Alanyl-L-Glutamine is much more stable, releases less ammonia in culture, and improves cell viability and growth.

Users are advised to review the literature for recommendations regarding medium supplementation and physiological growth requirements specific to different cell lines.
